### Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Investments in small and medium sized companies involve greater risks than those customarily associated with larger companies. The lack of common standards may result in different approaches to setting and achieving ESG objectives. In addition, the respect of the ESG criteria may cause the Fund to forego certain investment opportunities.

### Fund Strategy

The fund manager focuses on businesses, which can adapt to structural changes and generate sustainable corporate value. The team also favours companies with sound management and ESG credentials, which are attractively valued compared to their historical long-term valuation levels. In searching for investment opportunities, the fund manager does not seek economically sensitive companies but those that can achieve sustainable improvements in profits and capital efficiency. The consideration of ESG issues is an integral part of the investment process, from positive and negative screening, fundamental research, to portfolio construction and engagement. It is this approach that distinguishes the strategy from other typical value funds.

# ESG Supplement

## 30 June 2024

### ESG Characteristics

The Invesco Responsible Japanese Equity Value Discovery Fund (the fund) adopts a high-conviction active and ESG conscious approach to take advantage of overlooked transformations leading to sustainable corporate value creation underpinned by sound management and ESG initiatives among stocks that are attractively valued compared to their long-term potential. In other words, their price is attractive relative to their "normalised" earnings. In search of portfolio companies, the investment team seeks not cyclical but sustainable improvements in profit margins and capital efficiency where the portfolio manager and research analysts, who make an investment decision, undertake ESG risk and opportunity assessment. This approach distinguishes the strategy from other typical value funds. The consideration of sustainability characteristics is an integral part of every step of our investment process. The investment process of the fund is based on three building blocks: Bottom-up Stock Selection, ESG Approach and Proxy Voting and Engagement.

### SFDR (see Glossary)

The fund complies with article 8 of SFDR (the EU's Sustainable Finance Disclosure Regulation) in that it promotes environmental or social characteristics, and in that the companies in which investments are made follow good governance practices. More information is available at [www.invescomanagementcompany.lu](http://www.invescomanagementcompany.lu)

### Invesco's Commitment to ESG

Invesco has an investment-led ESG approach. We provide a comprehensive range of ESG focused capabilities that enable clients to express their values through investing. We also integrate financially material ESG considerations across our investment platform, taking into account critical factors that help us deliver strong outcomes to clients.

**Alcohol:** The company derives revenue from alcoholic beverages. This includes producers as well as distributors or owners of retail stores that sell alcoholic beverages.

#### Responsible Investment Approach definitions are as follows:

**ESG Integration:** The process of including ESG factors in the fundamental financial analysis of companies and investments.

**Negative Screen / Positive Allocation:** A process that either excludes a portion of the investment universe that score badly on ESG criteria, focuses upon companies engaged in positive activities for the community or natural world, such as recycling, education or public transport or a combination of both.

**Sustainable Investments:** An investment in an economic activity that meets the definition of a Sustainable Investment per Article 2 (17) of the SFDR.

**Impact Fund:** Funds managed with the intention of generating positive, measurable social and environmental impacts, where impact has priority over financial performance.

**Engagement:** The process of communicating with representatives of a company as a shareholder with the aim of improving their behaviour and policies.

**Voting (Equities only):** Also known as Proxy Voting, it is a form of voting whereby the fund manager casts votes on behalf of their mutual fund shareholders on a variety of issues, that may include the election of board members, merger or acquisition approvals, or approving a stock compensation plan.

## Glossary

**ESG Characteristics:** Environmental, social, and governance (ESG) information is a critical part of corporate and investment strategy and embedding material sustainability considerations into corporate and investment decisions is integral to long-term success from both financial and sustainability perspectives.

**MSCI ESG Fund Rating:** The Fund's ESG rating is designed to assess the resilience of the fund's aggregate holdings to long-term, financially relevant ESG risks and should facilitate the ability to rank or screen mutual funds and ETFs on a AAA to CCC ratings scale. This rating aims to provide fund level transparency and measures the ESG characteristics of the total portfolio. It is calculated as a direct mapping of MSCI ESG Quality Scores to letter rating categories. ESG Leaders are holdings with an ESG rating of AAA or AA (best in class), and ESG Laggards are holdings with an ESG rating of B or CCC.

**MSCI ESG Quality Score:** Calculated as the weighted average of the underlying holding's ESG scores, excluding any underlying holding where this information is not available. It is provided on a 0-10 scale, with 0 and 10 being the respective lowest and highest possible scores. MSCI scores underlying holdings according to their exposure to and management of key ESG issues, which are divided into three pillars: environmental, social and governance.

- **Environmental Pillar Score:** Provides an assessment of environmental factors including emissions, carbon footprint, fossil fuel usage and sustainable opportunities.
- **Social Pillar Score:** Relates to the operating environment of an underlying holding, including labour management, product liabilities, and health and safety.
- **Governance Pillar Score:** Provides an assessment of risk and management practices related to Corporate Governance and Corporate Behaviour.

**ESG % Coverage:** The percentage of the fund and comparator where MSCI ESG Research data is available.

**Financed Emissions:** Measure the greenhouse gas emissions associated with the investment. This figure represents the absolute overall exposure of the fund and is dependent on AUM, hence an increase in the AUM will cause the finance emissions to increase and vice versa. The fund AUM is used to calculate the Comparator's financed emissions which will also increase or decrease depending on the AUM size.

**Scope 1:** Covers direct emissions from owned or controlled sources.

**Scope 2:** Covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting company.

**Scope 3:** Includes all other indirect emissions that occur in a company's value chain.

**Relative Carbon Footprint:** The measure of the impact of activities on the amount of greenhouse gases produced, such as burning fossil fuels. Measured as Scope 1+ 2 Emissions per JPY 1M invested.

**Wtd Avg (Weighted Average) Carbon Intensity:** The underlying holdings exposure to carbon intensive holdings, calculated as the weighted average of the constituent's intensity metrics: Scope 1 + 2 emissions per USD 1M revenue for corporates and total country carbon emissions per USD 1M GDP for government bonds.

**% Carbon Coverage (excluding cash):** This represents the % weighting of the Fund/Benchmark for which carbon data is available.
