Fund Strategy

The fund manager uses a bottom up research process to focus on high quality companies with sustainable competitive advantages, particularly those with strong intangible values which generate healthy cash flows. Specifically, the team believes that companies with, including but not limited to, strong brands, technology and customer loyalty can offer compelling long-term investment returns when purchased at attractive prices. These values embedded within a robust business franchise are difficult to create or replicate, and allow companies to sustain a competitive advantage. The effective use of intangibles can generate strong free cash flow and increase enterprise value.
