Fund Strategy

The fund manager focuses on valuation at the point of purchase and believes that many of the best ideas are non-consensus. The fund manager deploys a bottom-up, valuation-driven approach to stock selection, using the assessment of a company and its valuation as the key driver in his decision-making process. The fund manager believes that the UK equity market is undervalued versus its own history, but as ever, uncertainty abounds both at home and abroad.

Past performance does not predict future returns. Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in the headline.
